CLOUDFLOORDNS - SECONDARY DNS SERVICES

SECURELY BACKUP YOUR PRIMARY DNS PROVIDER

CloudFloorDNS offers industry standard Secondary DNS that can securely backup your Primary DNS provider. Easily import your zones with AXFR and keep them in sync with NOTIFY and IXFR DNS technologies. By implementing a Secondary DNS solution, you can avoid expensive DNS downtime. Since DNS controls all aspects of your domain, including Email, Web and all other services, it's a critical service and should have a backup DR and redundancy with Secondary DNS. CloudFloorDNS has you covered!

Our Secure Web-Based GUI provides you with a simple and easy to use interface to view your backup zones. If the primary goes offline, our Secondary DNS will continue to answer requests. If your primary DNS is down for an extended time, you can also promote your backup zone to primary in one click!

Integrated DDoS protection
Integrated DDoS protection and mitigation on our Anycast Network. We closely monitor and rapidly react/mitigate to keep your DNS up and running

Powered by a global Anycast DNS network
Your Secondary DNS is safe on our global Anycast DNS network. Designed for speed and redundancy, we have 15 DNS points of presence (PoP's) to help keep your DNS fast and resilient and in sync with your Primary DNS.

Fast and Reliable with 100% Uptime SLA
Our Secondary DNS offers 100% uptime SLA to keep your Digital business operations up and running!

FLEXIBLE SECONDARY DNS

+ **INDUSTRY STANDARD SECONDARY**
  Securely backup your Primary DNS provider

+ **AXFR, IXFR AND NOTIFY -** Our platform provides AXFR, IXFR, NOTIFY options

FULL FEATURED MANAGED DNS AND DOMAIN PORTFOLIO MANAGEMENT

Restful API for DNS & Domain Functions - Easily integrate DNS and Domain operations into your platform

Wide Variety of TLD's and ccTLD's - Over 220 different TLD's and ccTLD's to choose from when registering or transferring domains

Free WHOIS Privacy - We offer 100% Free WHOIS privacy to help keep your information from being exploited

Multi Level Permissions, API Keys/Users - Have multiple DNS and Domain users? No problem - we offer multi-user ACL's and also offer API key creation for individual API user and system permissions

DNS Zone Backups, Zone Change Notification - Our DNS platform was built with security and redundancy in mind. Each DNS change is logged and our platform sends you a notification that DNS has been changed. You also get access to DNS zone backups that can easily be restored in an emergency

Domain Name Consolidation - Combine your DNS and Domains in a single platform with our Domain Consolidation. Auto Renew, Bulk Transfers & invoice options for larger domain portfolios

SSL Certificates - Our wide variety of SSL Certificate offerings from RapidSSL and GEOTrust provide your customers with the security they require for their critical sites and applications. Select from basic 256-bit certificates, Wildcard and TrueBizID extended verification certificates

Secondary DNS - Our Secondary DNS offers added security via increased resiliency. Compatible with major providers such as Cloudflare, UltraDNS, DNSMadeEasy, NS1, Dyn, Digicert and many others

A global DNS and Domain Name Portfolio management cloud platform that you can build your business on

Secure Forwarding services - Changing your Domain Name or acquiring a new brand? Our Secure Forwarding works as a reverse proxy - we install your secure certificate on our edge servers and can intercept specific hosts securely and redirect securely to any other secure URL. OEM & White label options allow you to customize the portal for your customers

Free DNS Load Balancing - All Enterprise DNS accounts come with free Round-Robin Load Balancing options

Exceptional Support - Our experts are here to help you with any DNS & Domain related issue you may have. Our FAQ and Helpdesk are a great place to start and if you continue to have trouble we also offer free phone and email support
